PRESS RELEASE

**FreeRetiredStuff.com INTRODUCES NEW "PRIVACY MAIL" FEATURE THROUGHOUT  
GLOBAL CLASSIFIED AD AND WANT AD VIRTUAL NEWSPAPER!!!!**

LEAVENWORTH, Kansas - October 2, 2006 - **FreeRetiredStuff.com**; a global, recycling resource provider, of FREE neighborhood text and photo classifieds and want ads, announced today that it has completed the testing and addition of a "PRIVACY MAIL" feature throughout the entire global portal database.

The "PRIVACY MAIL" feature protects the e-mail addresses of users who post FREE classified ads and want ads. Instead of displaying the poster's e-mail address in the ad, a "REPLY TO AD" link is displayed. The person replying to the ad then sees a form and clicks on a submit button to send their reply to the original poster.

"We want to ensure the privacy and comfort of our clients, over three (3) billion people in eighteen (18) geographic markets, not requiring them to reveal their e-mail address when posting ads," said John Gregory Lambros, President and Founder.

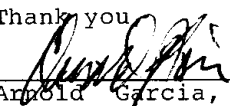

Along with this new feature - PRIVACY MESSAGING - "Free Retired Stuff" is currently speaking with several publicity and media consulting firms, as to ways to generate awareness in major print, broadcast, and online media.

The firm is the first of its kind to offer a FREE classified and want ad virtual newspaper to over one (1) million neighborhoods throughout the world, within one website, giving complete control to each individual neighborhood.

The mission of our website is simple, "protect the environment, by keeping usable unwanted stuff out of neighborhood landfills," by donating or receiving.
